

Welcome to Go My Meds

Revolutionizing Pharmacy and Patient Management

Why Choose Us

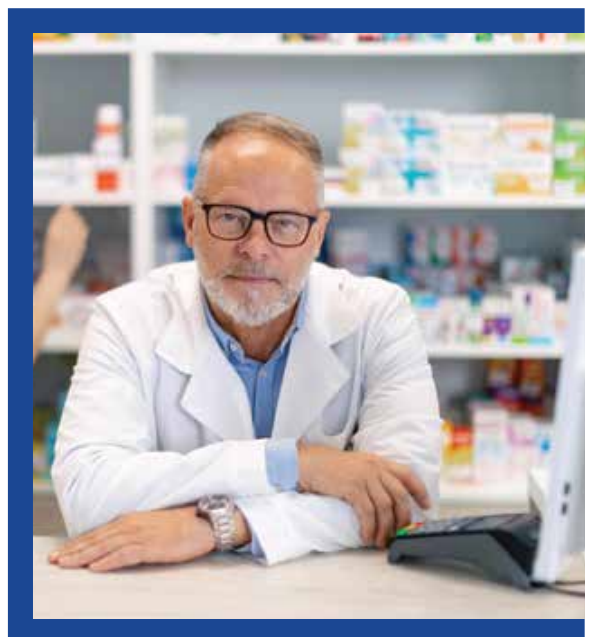

At **Go My Meds**, we understand the challenges healthcare providers face in managing and expanding their practices. That's why we offer a seamless, integrated solution designed to simplify every aspect of patient and prescription management. Discover why **Go My Meds** is your best choice for enhancing your company's efficiency and nationwide reach.

Nationwide Doctor Network

Our nationwide network of licensed physicians is ready to provide expert script writing services on behalf of your company. This allows you to offer a hands-free solution to your patients, without the added overhead of managing additional staff or expanding your facility. With **Go My Meds**, you can ensure that your patients receive the highest standard of care, backed by medical professionals across the country.

Nationwide Pharmacy Fulfillment

Leverage our extensive network of pharmacies to fulfill prescriptions across the nation. This unique service enables your practice to serve patients far beyond your local area, providing unmatched flexibility and growth potential. Our coordination with the doctor network ensures prescriptions are filled accurately and efficiently, enhancing patient satisfaction and adherence to treatment.

About Us

Go My Meds specializes in comprehensive medical evaluation services, utilizing our network of licensed doctors across the U.S. Our operations are supported by **FDA-registered** and **cGMP-compliant** facilities, ensuring high standards of safety and efficiency. With our advanced software, we streamline prescription management, enabling companies to deliver exceptional care seamlessly.

Facilities Across The Nation

Our network includes multiple 503a and 503b pharmacies strategically located across the country, encompassing over 145,000 square feet of advanced, state-of-the-art facilities. Each of our pharmacies is an FDA-approved facility, adhering strictly to all regulatory standards. Equipped with the latest technology, our sites have the capacity to produce over 70,000 tablets per hour,

Third-Party Lab Testing

At Go My Meds, we prioritize the safety and quality of our medications through rigorous third-party lab testing. All of our medications are tested by licensed, independent laboratories to ensure they meet the highest standards of safety and efficacy. This strict testing protocol allows us to confidently guarantee the integrity and reliability of every product we deliver.

Sourcing Raw Materials

At Go My Meds, we are committed to the highest standards of pharmaceutical quality, starting with our raw material sourcing. We exclusively source pure active ingredients, avoiding any salt-based compounds, to ensure the efficacy and safety of our products. By partnering with trusted suppliers known for their high-quality standards, we guarantee that every ingredient we use is of the utmost purity.

Pharmacy

Licensures and Accreditations

At **Go My Meds**, we pride ourselves on meeting and exceeding the stringent standards set for pharmacies. Our facilities are fully licensed, accredited, and FDA approved, demonstrating our commitment to excellence in healthcare delivery. Here are the key accreditations that endorse our high standards:

PCAB (Pharmacy Compounding Accreditation Board)

Ensures that our compounding practices meet the rigorous PCAB quality and safety standards, providing assurance that we offer the highest quality compounded medications.

ACHC (Accreditation Commission for Health Care)

Highlights our commitment to maintaining a higher level of operation and customer care that meets the nationally recognized standards of ACHC.

URAC (Utilization Review Accreditation Commission)

Recognizes our dedication to quality and accountability in specialty pharmacy services, ensuring we meet comprehensive standards for quality care and patient safety.

ATA (American Telemedicine Association)

Highlights our commitment to maintaining a higher level of operation and customer care that meets the nationally recognized standards of ACHC.

Technology

Software and Management

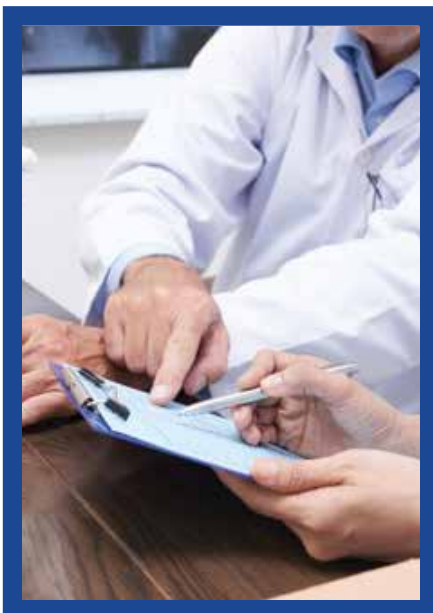

EHR + Order Management System

Our proprietary software is the backbone of our service, offering you a powerful tool for managing orders, patient information, and customer service all in one place. Key features include:

- ⊕ **Order Management:**
Track and manage medication orders seamlessly.
- ⊕ **Patient Records:**
Securely access and view patient health information.
- ⊕ **Electronic Prescribing**
Prescribe medications electronically with our e-scribing dashboard.
- ⊕ **Sales Tracking:**
Analyze and monitor your sales history for strategic planning.
- ⊕ **Automated Communications:**
Keep your patients informed with automatic email notifications.
- ⊕ **Customer Support:**
Resolve issues and answer patient questions efficiently.

** Customers can check their prescription status, manage their order, ask questions, view health tips, and more through their secure profile.*

Custom White-Labeled Solutions

Customize the patient experience with white-labeled health history forms and checkout processes. Our platform allows you to maintain your brand identity while using our state-of-the-art tools. Patients will interact with a system that looks and feels like an extension of your own company, building trust and loyalty. Additionally, custom user accounts enhance the patient experience, providing a personal touch that sets your company apart.

Onboarding

Client Step By Step Process

STEP 1

COLLECT BUSINESS INFORMATION

Begin the onboarding process by collecting basic business information. You can use the provided onboarding form link. This form will collect essential business information.

STEP 2

CREATE AND SEND CONTRACT

A tailored contract including detailed pricing information will be drafted. This contract outlines the scope of services, pricing, responsibilities, and the terms of use.

STEP 3

CLIENT ACCOUNT CREATION

After contract approval, a dedicated client account is created.

This account setup includes:

- + The development of a customized health history checkout form.
 - + Order and patient management dashboard.
 - + Customized patient accounts and login dashboard.
- + Branded subdomain - www.start.BRAND.com *need access to domain hosting settings*
- + Branded company email notifications *need access to email server*

STEP 4

BEGIN PATIENT REFERRALS

After account creation clients are now ready to refer patients. Start directing them to complete their health history forms using the customized form links provided after their new account creation. Use these custom links on company webpages and marketing materials.

Semaglutide

Oral Disolvable Tablet

Semaglutide (ODT)

Experience the convenience of taking Semaglutide without the discomfort or hassle of injections. Our oral tablets dissolve quickly and can be taken anywhere without the hassle of refrigerating.

Daily Sublingual Tablet

Experience the simplicity of a daily sublingual tablet. This user-friendly format eliminates the complexity and discomfort associated with injections, providing a straightforward alternative for medication delivery.

Exact Dose Every Time:

Benefit from the unmatched accuracy of our tablets which provide exact dosing, eliminating the common user errors associated with self-administered injections.

USA Made in FDA Approved Facility:

Our tablets are manufactured in an FDA registered pharmacy, ensuring each batch meets the rigorous standards for safety, quality, and efficacy expected in pharmaceutical production.

Patent Pending Formula

This innovative composition has been designed to optimize the delivery and efficacy of Semaglutide, providing a unique selling point that sets our product apart from traditional options.

Semaglutide (ODT)

Medication Description

Semaglutide 0.25mg / Vitamin B6 Pyridoxine HCL) 10mg.
Tablet is Light Green in color
Semaglutide 0.5mg / Vitamin B6 (Pyridoxine HCL) 10mg.
Tablet is Darker Green color

Pyridoxine HCL (Vitamin B6)

- + Vitamin B6 is needed for the proper function of sugars, fats, and proteins in the body. It's also necessary for the development of the brain, nerves, skin, and many other parts of the body.

Semaglutide

Pronunciation:(sem-a-gloo-tide) What is this drug used for?

- + It is used to lower blood sugar in people with type 2 diabetes.

What do I need to tell my doctor BEFORE I take this drug?

- + If you are allergic to this drug; any part of this drug; or any other drugs, foods, or substances. Tell your doctor about the allergy and what signs you had.
- + If you ever had pancreatitis.
- + If you have or have ever had depression or thoughts of suicide.
- + If you are taking another drug that has the same drug in it.
- + If you are using another drug like this one. If you are not sure, ask your doctor or pharmacist.
- + If you have type 1 diabetes. Do not use this drug to treat type 1 diabetes.

This is not a list of all drugs or health problems that interact with this drug. Tell your doctor and pharmacist about all of your drugs (prescription or OTC, natural products, vitamins) and health problems. You must check to make sure that it is safe for you to take this drug with all of your drugs and health problems. Do not start, stop, or change the dose of any drug without checking with your doctor.

What are some things I need to know or do while I take this drug?

- + Tell all of your health care providers that you take this drug. This includes your doctors, nurses, pharmacists, and dentists.
- + Follow the diet and workout plan that your doctor told you about.
- + Have blood work checked as you have been told by the doctor. Talk with the doctor.
- + Talk with your doctor before you drink alcohol. Kidney problems have happened. Sometimes, these may need to be treated in the hospital or with dialysis.
- + If you cannot drink liquids by mouth or if you have upset stomach, throwing up, or diarrhea that does not go away; you need to avoid getting dehydrated. Contact your doctor to find out what to do. Dehydration may lead to blow blood pressure or to new or worse kidney problems.
- + If you are planning on getting pregnant, talk with your doctor. You may need to stop taking this drug at least 2 months before getting pregnant.

- + Wear disease medical alert ID (identification). Check your blood sugar as you have been told by your doctor.
- + Do not drive if your blood sugar has been low. There is a greater chance of you having a crash.
- + People taking this drug with other drugs for diabetes may have a raised risk of low blood sugar. Very low blood sugar can lead to seizures, passing out, long lasting brain damage, and sometimes death. Talk with the doctor.
- + It may be harder to control blood sugar during times of stress such as fever, infection, injury, or surgery. A change in physical activity, exercise, or diet may also affect blood sugar.
- + Tell your doctor if you are pregnant, plan on getting pregnant, or are breast-feeding. You will need to talk about the benefits and risks to you and the baby.

What are some side effects that I need to call my doctor about right away?

WARNING/CAUTION: Even though it may be rare, some people may have very bad and sometimes deadly side effects when taking a drug. Tell your doctor or get medical help right away if you have any of the following signs or symptoms that may be related to a very bad side effect:

- + Signs of an allergic reaction, like rash; hives; itching; red, swollen, blistered, or peeling skin with or without fever; wheezing; tightness in the chest or throat; trouble breathing, swallowing, or talking; unusual hoarseness; or swelling of the mouth, face, lips, tongue, or throat.
- + Signs of kidney problems like unable to pass urine, change in how much urine is passed, blood in the urine, or a big weight gain.
- + Signs of gallbladder problems like pain in the upper right belly area, right shoulder area, or between the shoulder blades; change in stools; dark urine or yellow skin or eyes; or fever with chills.
- + Very bad dizziness or passing out.
- + A fast heartbeat.
- + Change in eyesight.
- + Low blood sugar can happen. The chance may be raised when this drug is used with other drugs for diabetes. Signs may be dizziness, headache, feeling sleepy or weak, shaking, fast heartbeat, confusion, hunger, or sweating. Call your doctor right away if you have any of these signs. Follow what you have been told to do for low blood sugar. This may include taking glucose tablets, liquid glucose, or some fruit juices.
- + Severe and sometimes deadly pancreas problems (pancreatitis) have happened with this drug. Call your doctor right away if you have severe stomach pain, severe back pain, or severe upset stomach or throwing up.

Semaglutide (ODT)

What are some other side effects of this drug?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Call your doctor or get medical help if any of these side effects or any other side effects bother you or do not go away:

- + Constipation, diarrhea, stomach pain, upset stomach, or throwing up.
- + Decreased appetite.

These are not all of the side effects that may occur. If you have questions about side effects, call your doctor. Call your doctor for medical advice about side effects.

You may report side effects to the FDA at 1-800-332-1088. You may also report side effects at <http://www.fda.gov/medwatch>.

How is this drug best taken?

Use this drug as ordered by your doctor. Read all information given to you. Follow all instructions closely.

- + Take at least 30 minutes before the first food, drink, or drugs of the day.
- + Take with plain water only. Do not take with more than 4 ounces (120 mL) of water.
- + Rapid Dissolve Tables - this type of tablet is designed to rapidly dissolve in the mouth and/or under the tongue. Partially chewing tablet, allowing it to disintegrate orally is allowed.
- + Keep taking this drug as you have been told by your doctor or other health care provider, even if you feel well.

What do I do if I miss a dose?

- + Skip the missed dose and go back to your normal time.
- + Do not take 2 doses at the same time or extra doses.

How do I store and/or throw out this drug?

- + Store in the original container at room temperature.
- + Store in a dry place. Do not store in a bathroom.
- + Keep all drugs in a safe place. Keep all drugs out of the reach of children and pets.
- + Throw away unused or expired drugs. Do not flush down a toilet or pour down a drain unless you are told to do so.
- + Check with your pharmacist if you have questions about the best way to throw out drugs. There may be drug take-back programs in your area.

ORDER PROCESS

STEP 1

HEALTH HISTORY FORM

Patients start by completing an online health history form detailing their medical background, current health conditions, and medication use.

STEP 2

DOCTOR REVIEW

Our licensed physician will review the completed health history form for the patient, considering their overall health and weight management needs.

STEP 3

PATIENT RECEIVES

Prescription Following approval, the medication will be fulfilled within 24 hours, delivered directly to their home, along with comprehensive usage instructions.
